## Engineering Physics

1	<b>Title of the course (L-T-P-C)</b>	<b>Computer Architecture Laboratory (0-0-3-3)</b>
2	<b>Pre-requisite courses(s)</b>	--
3	<b>Course content</b>	The lab will closely follow the theory course. The idea isto have the students develop a software model of a simple processor, capturing both functionality and timing aspects. They will implement modules as the concepts aretaught in class.
